JOURNAL OF CRYSTAL GROWTH

Subject index

Apparatus
- for forced flow growth 261
- for gallium nitride synthesis 47
- for gravity influence on protein crystallization 587
- for laser manipulating of seeding 685
- for microbatch crystallization 450, 665
- for microgravity crystal growth 572
- for polythermal microbatch growth 447
- for protein diagnostics 638
- for protein growth 602, 610
- for solubility measurements under high pressure 204

Computer simulation
- of crystal lattices 276
- of dislocation density 62
- of liquid/liquid diffusion 442

Convection 83, 261, 572, 623, 703

Device characterization
- electronic materials 97
- solar cells 13
- quantum dots and wires 23

Diffusional control
- of hen egg white lysozyme 623, 703
- of protein crystal growth 572

Dissolution
- of proteins under high pressure 204

Electronic materials, see Device characterization

Epitaxy, see Thin film growth

Etching
- chemical 1

Hydrodynamics, see Convection

Kinetics
- of growth 1, 115, 156, 220, 261, 285, 297, 471, 503, 623, 649, 703
- of interface control 41, 261, 524
- of nucleation 1, 220, 226, 243, 388, 471, 524, 649

Lasers, crystals for
- potassium gadolinium tungstate 181

Lysozyme 193, 204, 226, 243, 261, 285, 319, 332, 403, 503, 511, 535, 546, 559, 649, 674, 691, 703

Melt growth technique
- by Czochralski method
  - of calcium gadolinium alumate 122
  - of silicon 111

Microgravity, growth under
- high pressure 204
- of lysozyme 319, 524, 623, 649, 703
- of parvalbumin 595
- of proteins 261, 325, 442, 572, 602, 610, 638

Morphological stability
- of clathrate hydrate 164
- of macromolecular crystallization 471
- of zinc selenide 83

Nucleation
- of cuprous chloride nanocrystals 135
- of gibbsite 174
- of lysozyme 220, 226, 243, 649
- of macromolecular crystals 250
- of proteins 185, 325, 356, 365, 377, 388, 395, 415, 434, 456, 489

Numbers
- Peclet 649, 261

Phase diagram
- of endoglucanase-A 297
- of lysozyme 193, 332
- of proteins 185, 204, 388, 415, 424

Precursor, for
- phosphine 33

Purification of
- of glutamic acid specific protease 313
- of proteins 674

Quantum dots and wires, see Device characterization

Solid growth technique
- by phase separation
  - of cuprous chloride 135

Solution growth technique
- by batch crystallization
  - of endoglucanase-A 297
  - of gibbsite 174
  - of lysozyme 220
- by cold travelling heater method
